

ABSTRACT OF THE DISCLOSURE

5 A headset for playing pre-recorded information in response to
a verbal command includes an earpiece, an audio output assembly
coupled to the earpiece, a microprocessor, a flexible member, and a
microphone coupled to the flexible member. The microphone and
audio output assembly are operationally coupled to the
10 microprocessor so that a user hears an audio output such as a
foreign language translation or recipe in response to a verbal input
such as a native language term or recipe name.
